

The Restorative Collection

A Curative Innovation for Sensitive & Compromised Skin

AVAILABLE FROM: CLEANSER €109 - £ 96 - \$ 128 | CREAM €248 - £ 218 - \$ 290

*Seed to Skin Tuscany launches **The Rescue Cleanse** and **The Recovery Cream**, two scientifically advanced skincare treatments proven to restore balance, soothe sensitivity and heal visible signs of reactivity*

Tuscany, March 2026

A NEW CHAPTER IN SKIN HEALTH

Seed to Skin Tuscany presents *The Restorative Collection*, a breakthrough in the treatment of compromised and reactive skin. Created to address the daily challenges faced by those prone to redness, burning, dryness, flare-ups and rosacea-like sensitivity, the collection is designed not simply to comfort, but to heal. Each formulation has been developed to restore barrier integrity, calm inflammatory pathways and re-establish equilibrium in the skin, while preserving the potent efficacy that defines every Seed to Skin creation.

The collection launches with two signature skincare treatments: *The Rescue Cleanse* – a glycerin-to-silk transforming cleanser that emulsifies on the skin, lifting away impurities while instantly calming reactivity – and *The Recovery Cream* – a rich, restorative treatment that delivers intense hydration, strengthens barrier function, and leaves the complexion smooth, even, and comforted.

Together, they provide a complete solution for skin in distress, grounded in scientific precision and proven by clinical testing.

CURATIVE CARE FOR REACTIVE CONDITIONS

The *Restorative Collection* was conceived in response to the growing prevalence of skin conditions linked to environmental stress, compromised barriers, and heightened inflammation. Beyond surface irritation, compromised skin often experiences chronic redness, burning sensations, dryness, and episodes of acute flare-ups. Left untreated, these conditions can escalate, undermining resilience and accelerating premature ageing.

Clinical evaluation of *The Rescue Cleanse* and *The Recovery Cream* conducted by **Merieux Nutrisciences** demonstrated measurable improvements across the hallmarks of sensitivity. **Redness** was visibly reduced by **23.5%**, **dryness** levels significantly decreased by **30.8%**, and participants reported a marked decrease in sensations of **burning (-57.9%)**, **itching** and **discomfort (-36%)**. After 28 days of use, skin appeared calmer, stronger and more uniform in tone, with results validated by dermatologist assessment and advanced imaging technologies.

THE RESCUE CLEANSE

Dual Action Recovery

The Rescue Cleanse – Dual Action Recovery is an emulsifying glycerin-to-silk wash that transforms daily cleansing into a curative treatment. Upon contact with water, the lustrous oil emulsifies into a gentle balm, effortlessly lifting away impurities, pollution particles and excess sebum while preserving the delicate equilibrium of sensitive skin. The result is a complexion that feels purified yet comforted, smooth, and free from tightness.

KEY NATURAL INGREDIENTS:

Shared Formulation Building Blocks

HYPERICUM & CALENDULA MACERATED OIL

At the foundation of the formula lies our **proprietary macerated oil**, a slow infusion of **rice bran oil** with **Hypericum** and **Calendula**. Naturally rich in ferulic acid and soothing phytoactives, this exclusive blend delivers a targeted anti-inflammatory, anti-oxidant and anti-redness effect, helping to interrupt irritation pathways, strengthen capillaries, and promote natural tissue repair. With every cleanse, it cushions the skin in comfort while reinforcing its ability to recover from stress.

Phytoactive Repair Matrix

AVOCADO BIOACTIVE COMPLEX

Through advanced green biotechnology, the most active fraction of **avocado oil** – abundant in phytosterols, tocopherols, and squalene – is isolated to deliver intense nourishment and barrier support. This bioactive complex restores elasticity, calms inflammation, and strengthens the skin's defences against irritation, ensuring high efficacy with complete biocompatibility.

CAPPARIS SPINOSA (CAPER BUD EXTRACT)

Known for its potent **anti-inflammatory** and **soothing** properties, Capparis spinosa helps reduce redness, irritation, and skin reactivity. It supports microcirculation and reinforces the skin's tolerance threshold, making it particularly beneficial for sensitive, inflamed, or stressed skin.

OLIVE LEAF EXTRACT

Exceptionally rich in polyphenols such as oleuropein, olive leaf extract provides powerful antioxidant protection. It helps **defend the skin against oxidative stress**, supports collagen integrity, and contributes to the prevention of fine lines and premature ageing while strengthening the skin's **natural defence mechanisms**.

SICILIAN PRICKLY PEAR (OPUNTIA FICUS-INDICA)

A naturally calming and hydrating botanical, prickly pear helps **soothe inflammation**, **reduce itching**, and **support skin repair**. Its antioxidant and moisturising properties make it especially effective in conditions associated with dryness, sensitivity, and compromised barrier function.

CAMELINA SATIVA OIL

Also known as "gold of pleasure", this ancient oilseed crop is rich in **polyunsaturated fatty acids**, anti-ageing **tocopherols**, and **natural antioxidants** that replenish essential lipids and restore suppleness. Exceptionally lightweight yet deeply nourishing, it helps to quiet the visible signs of irritation and dryness that often accompany sensitive or compromised skin thanks to its **high content of omega-3, -6, and -9**, which modulate inflammation and improve cell elasticity and resistance to infection, playing a therapeutic role in skin disorders due to their involvement in immune and hormonal modulation.

PINK MINERAL CLAY

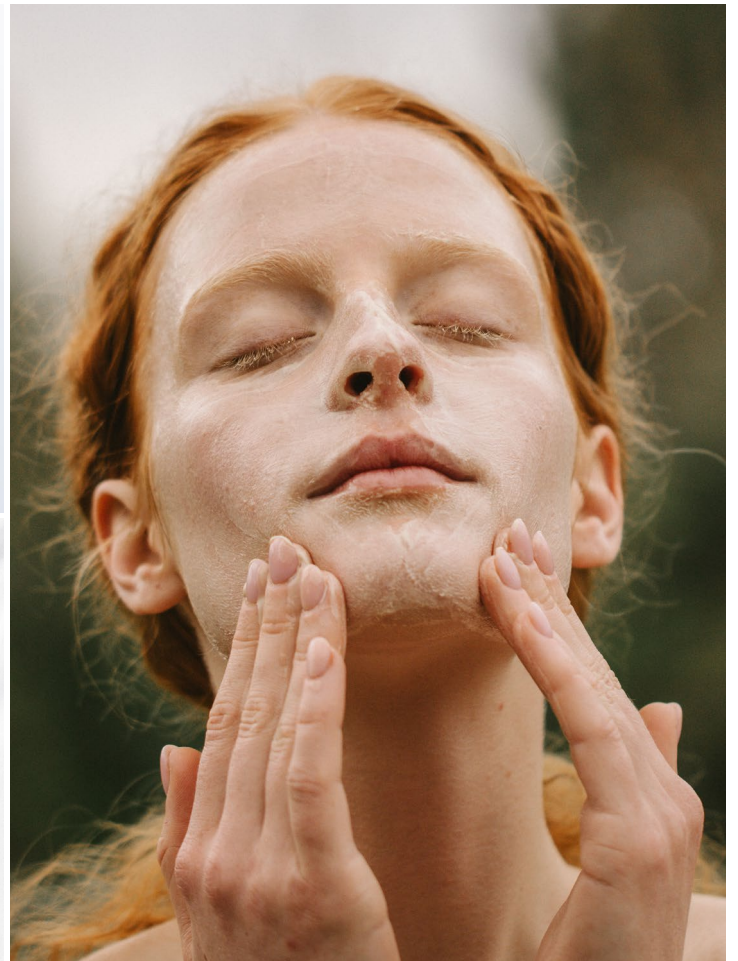

Chosen for the particularly soothing properties given by its natural minerals, this silica-rich mineral clay detoxifies and refines without disrupting the skin's balance. Its fine, lamellar particles attract and absorb impurities while leaving the skin smooth and refreshed. With regular use, it is clinically shown to **reduce excess sebum by 15%** and improve elasticity and tone, boasting a **20% reduction in acne lesions** and up to **20% decrease in inflammation** associated with acne – promoting the skin's natural balance and clarity.

NIGELLA SATIVA (BLACK SEED) OIL

A treasured botanical long used in traditional medicine across the Middle East, Asia, and Africa, **Nigella sativa** – also known as Black Seed oil, black cumin, or "the blessed seed" – is rich in unsaturated fatty acids, **vitamins, minerals**, and potent anti-inflammatory and antioxidant compound **thymoquinone**. It helps soothe irritation, reduce visible redness, and promote barrier repair, supporting skin resilience over time. Its balancing effect makes it particularly beneficial for complexions prone to both dryness and inflammation.

CALOPHYLLUM INOPHYLLUM (TAMANU) OIL

A restorative botanical oil pressed from the seeds of the Tamanu tree, also referred to as "Beautyleaf", it is known for its ability to support skin repair and calm inflammation. Rich in polyunsaturated fatty acids and unique bioactives, Tamanu oil supports collagen production and skin renewal, with studies showing a **+37% increase in collagen synthesis** in just six days. It also significantly enhances the skin's natural healing response, contributing to accelerate tissue repair and wound closure by **up to 50%**, helping skin recover faster and more evenly. Additional laboratory data demonstrate the oil's ability to absorb UV radiation and **inhibit up to 85% of UV-induced DNA damage**, supporting long-term skin integrity.

Suitable for all skin types, including rosacea- and acne-prone skin, The Rescue Cleanse is particularly indicated for hypersensitivity, redness, dryness, and compromised barrier function. With daily use, skin feels purified yet cocooned, its comfort restored and its barrier visibly strengthened.

THE RECOVERY CREAM

Calm and Restore Complex

The Recovery Cream – Calm and Restore Complex is a deeply soothing cream designed as a molecular complex enriched by advanced encapsulated ingredients to target inflammation, barrier disruption and chronic sensitivity. Its luxuriously rich yet easily absorbed texture cocoons the skin, creating an immediate sensation of comfort while long-term actives work to re-establish structural integrity and cellular balance.

KEY NATURAL INGREDIENTS:

Shared Formulation Building Blocks

HYPERICUM & CALENDULA MACERATED OIL

Our **signature macerated oil**, achieved from **rice bran** infused with **Hypericum** and **Calendula**, forms part of the shared botanical foundation of the Sensitive Line. This infusion concentrates ferulic acid and soothing phytoactives, visibly reducing redness and supporting the skin's natural regeneration processes. Acting in good companionship, **Rice starch** forms a soft, breathable film to minimise friction and maintain hydration, ensuring immediate and lasting comfort and amplifying the effects of active ingredients.

Advanced Encapsulation Systems

This formula is built not only on what it contains, but on how those ingredients are delivered. Two complementary encapsulation systems transport actives into the skin in a more stable, targeted, and progressive way, so they can work more effectively over time. They work on different levels of skin, delivering hydration and protection on the surface while targeting deeper levels of the skin.

1. ENCAPSULATED REGENERATIVE SYSTEM (HYDROPHILIC CAPSULE TECHNOLOGY)

Designed to support repair and renewal, this system uses a water-based biomimetic capsule combining a cellulose polymer matrix with high molecular weight hyaluronic acid, designed for progressive diffusion of actives within the epidermis.

Encapsulated actives:

- **Copper Peptides** – Copper peptides work as biological signals, prompting the skin to repair and renew itself. By delivering copper – an essential element to collagen production and healing – directly where it's needed, they support regeneration, reduce inflammation, and support collagen and elastin synthesis.
- **Low Molecular Weight Hyaluronic Acid** – penetrates more effectively into the upper layers of the skin, drawing in and retaining moisture where it's needed most. This helps improve hydration, support skin plumpness, and create the optimal environment for cellular communication and repair.
- **Resveratrol** – This high-performance polyphenol helps preserve skin function under stress. It works by protecting cells from oxidative damage caused by UV exposure, pollution, and environmental aggressors – factors that accelerate sensitivity and premature ageing. At the same time, it **helps regulate inflammatory responses**, preventing them from becoming chronic or visible on the skin.

Together, they support repair, improve elasticity, and strengthen skin resilience through controlled, sustained release.

2. ENCAPSULATED NOURISHING SYSTEM (LIPID-DELIVERY COMPLEX)

Designed to replenish essential lipids by integrating seamlessly into the skin's matrix, this system focuses on restoring the skin barrier – the layer responsible for keeping moisture in and irritation out. It delivers essential lipids in a form the skin can readily recognise and absorb.

Encapsulated actives:

- **Ceramide AP** – These essential lipids are naturally found in the skin, playing a key role in maintaining a strong, intact barrier. They work by **replenishing the skin's intercellular matrix** – the "cement" that holds skin cells together – helping to prevent moisture loss and protect against external irritants. By restoring this structure, ceramides improve hydration, reduce sensitivity, and strengthen the skin's ability to defend itself against daily stress.
- **Omega-6 Fatty Acids** – By reinforcing the lipid barrier, they improve suppleness, reduce moisture loss, and help calm inflammatory responses, leaving skin more balanced and comfortable.

This system ensures long-lasting nourishment and improved barrier cohesion, essential for compromised skin.

Phytoactive Repair Matrix

REISHI MUSHROOM FERMENT

A postbiotic powerhouse, **Reishi mushroom ferment** accelerates **barrier recovery by 26%** and **wound healing by 45%**, making it indispensable for fragile or compromised skin. Rich in triterpenoids and beta-glucans, it supports the renewal of keratinocytes, the main cells of the epidermis – with clinical testing revealing a **+40.8% increase in wound area recovered**, and a **-62% reduction in wound depth** for skin that's visibly smoother and refined. By inhibiting pro-inflammatory pathways, it also reduces skin stress responses, encouraging healthier, more balanced skin function – especially beneficial for sensitive or inflamed skin.

LICORICE ROOT EXTRACT

Through a sustainable extraction process, discarded licorice roots are transformed into **plant-derived exosomes** – microscopic phospholipid vesicles that transport actives deep within the skin. These intelligent carriers deliver licorice's potent phytoactives directly to the source of inflammation, suppressing collagen- and elastin-degrading enzymes by 41% to accelerate regeneration and strengthen the barrier. Clinically shown to reduce redness and **calm erythema by up to 16%** within minutes, this technology also **enhances moisture retention by 48%** after eight hours and **decreases transepidermal water loss by 36%**, ensuring visible comfort and long-term resilience. In addition, licorice helps **reduce oxidative stress by 35%**, shielding the skin from DNA, protein, and lipid oxidation linked to premature ageing.

ACACIA CATECHU WOOD EXTRACT

Derived from the heartwood of the Acacia tree, this powerful botanical – long revered in both Chinese and Ayurvedic medicine – is clinically shown to reduce redness with the same efficacy as cortisol cream, without the side effects of thinning skin and suppressed immune response. Clinically shown to deliver **up to 70% antioxidant protection**, it outperforms other renowned natural actives such as green tea, bilberry, and curcumin. The result is a multifunctional active that defends against ageing, pollution, and UV exposure, helping skin appear stronger, smoother, and better protected from future flare-ups.

ZANTHOXYLUM BUNGEANUM (CHINESE PRICKLY ASH)

A true **neurocosmetic active**, *Zanthoxylum bungeanum* has long been valued for its ability to regulate the skin's sensory responses. By **interacting with cutaneous nerve receptors**, it helps quickly relieve sensations of burning, stinging, and discomfort often associated with reactive skin. At the same time, it acts on motor neurons at the neuromuscular junction, **reducing facial micro-contractions** – by over 60% within five minutes and up to 88% within fifteen – leading to a visible relaxation of expression lines, particularly around the eyes and forehead. Clinical studies also show a **16% reduction in skin roughness** within just 30 minutes, while continued use over one month delivers cumulative lifting and smoothing effects. The result is skin that feels calmer, appears more relaxed, and reflects a naturally refined, even radiance.

PHYLLOSTACHYS PUBESCENS (MOSO BAMBOO)

A natural source of silica, *Phyllostachys pubescens* helps strengthen the skin's structure and reinforce its protective barrier – key for reducing sensitivity over time. It has been shown to calm inflammation and support faster barrier repair, helping skin recover more efficiently from external stress. Combined with **Scutellaria baicalensis root extract**, it forms a clinically tested synergistic complex, where each ingredient enhances the other's effect. Together, they provide broad protection against inflammation and oxidative damage, with up to **70% antioxidant activity**, leaving skin stronger, calmer, and more resilient.

ROSA DAMASCENA HYDROLAT

Rosa damascena hydrolate provides gentle hydration while helping to soothe and rebalance the skin. Naturally rich in polyphenols, it offers antioxidant protection and helps calm visible redness, while its **mild toning effect** refines the skin while enveloping it in comfort and protection.

BISABOLOL

Derived from chamomile, **Bisabolol** is renowned for its immediate soothing and protective action. It calms irritation, defends against oxidative stress, and supports the skin's recovery after exposure to environmental aggressors. Lightweight yet deeply effective, it adds a final layer of comfort and care, sealing in moisture while reinforcing the skin's natural barrier function.

NIGELLA SATIVA (BLACK SEED) OIL

A treasured botanical long used in traditional medicine across the Middle East, Asia, and Africa, **Nigella sativa** – also known as Black Seed oil, black cumin, or "the blessed seed" – is rich in unsaturated fatty acids, **vitamins, minerals**, and potent anti-inflammatory and antioxidant compound **thymoquinone**. It helps soothe irritation, reduce visible redness, and promote barrier repair, supporting skin resilience over time. Its balancing effect makes it particularly beneficial for complexions prone to both dryness and inflammation.

CAMELINA SATIVA OIL

Also known as “gold of pleasure”, this ancient oilseed crop is rich in **polyunsaturated fatty acids**, anti-ageing **tocopherols**, and **natural antioxidants** that replenish essential lipids and restore suppleness. Exceptionally lightweight yet deeply nourishing, it helps to quiet the visible signs of irritation and dryness that often accompany sensitive or compromised skin thanks to its **high content of omega-3, -6, and -9**, which modulate inflammation and improve cell elasticity and resistance to infection, playing a therapeutic role in skin disorders due to their involvement in immune and hormonal modulation.

CAPPARIS SPINOSA (CAPER BUD EXTRACT)

Rich in flavonoids and polyphenols with proven **anti-inflammatory** and **vasoprotective** activity. Helps reduce redness, soothe reactive skin, and support microcirculation. Particularly effective in calming inflammatory skin responses associated with acne, dermatitis, and irritation, while contributing to improved skin tone uniformity.

OLIVE LEAF EXTRACT

A potent antioxidant source containing oleuropein and bioactive polyphenols. **Protects** against oxidative stress and photo-induced damage, **supports collagen preservation**, and helps protect against oxidative processes associated with premature ageing. Its **antimicrobial** and anti-inflammatory properties make it supportive in topical treatments of acne, seborrheic dermatitis, and compromised skin states.

SICILIAN PRICKLY PEAR (OPUNTIA FICUS-INDICA)

Known for its soothing, barrier-repairing, and humectant properties. Helps **calm inflammation, reduce itching**, and support **epidermal healing** in sensitised or inflamed skin. Contributes to wound repair, relief from cutaneous discomfort, and reinforcement of the skin's natural self-regulating and protective mechanisms.

MEADOWFOAM SEED OIL

A highly stable lipid that closely **mimics the skin's natural oils**, it helps reinforce the barrier and prevent moisture loss, while delivering **lasting hydration without heaviness**. Its antioxidant properties further protect against environmental stress, leaving the skin soft, balanced, and more resilient over time.

Together, these actives form a **biomimetic complex** that mirrors the skin's own architecture, working in harmony to reduce inflammation, rebuild barrier strength, and restore radiance. Clinical testing has demonstrated measurable improvement in barrier performance (TEWL -1.9%), along with sustained gains in smoothness, tone, and comfort over the 28-day testing period.

With consistent use, **The Recovery Cream** transforms sensitivity into strength, revealing skin that is calm, supple, and luminous.

TOP ACTIONS & INGREDIENTS RESPONSIBLE

Soothing & Anti-Inflammatory

Ingredients:

Camelina Sativa Oil, Nigella Sativa (Black Seed) Oil, Avocado Bioactive Complex, Calming Herbal Extract, Acacia Catechu Wood Extract, Reishi Mushroom Ferment, Licorice Root Extract, Bisabolol, Tamanu Oil.

Action:

These ingredients help reduce inflammation and visible redness while soothing sensations of burning and discomfort thanks to a direct effect on sensory pathways at a cellular level. By supporting the skin's natural ability to self-regulate, they promote equilibrium and lasting comfort, leaving reactive skin calm and balanced.

Wound Healing

Ingredients:

Reishi Mushroom Ferment, Tamanu Oil, Hypericum & Calendula Macerated Oil, Acacia Catechu Wood Extract

Action:

These regenerative actives support the skin's natural healing processes by stimulating keratinocyte renewal and promoting collagen synthesis. They help repair microdamage and strengthen fragile or compromised areas, ensuring faster recovery, smoother texture, and visibly healthier skin.

Barrier Protection & Repair

Ingredients:

Avocado Phytoactive Complex, Camelina Sativa Oil, Nigella Sativa Oil, Ceramides, Rice Starch, Reishi Mushroom Ferment, Squalane, Shea Butter, Phospholipids

Action:

These actives rebuild the integrity of the skin's barrier, reinforcing its structure and reducing transepidermal water loss. They help replenish essential fatty acids, enhance elasticity, and maintain optimal hydration for skin that feels stronger, smoother, and restored.

Regeneration & Radiance

Ingredients:

Reishi Mushroom Ferment, Hypericum & Calendula Macerated Oil, Licorice Root Extract, Tamanu Oil, Acacia Catechu Wood Extract, Zanthoxylum Bungeanum

Action:

These bioactive ingredients stimulate cellular renewal and collagen production to refine texture and improve tone. They help counteract oxidative stress and boost radiance, revealing skin that appears even, healthy, and visibly renewed.

EFFICACY AT A GLANCE BY MERIEUX NUTRISCIENCES

The efficacy of the *Restorative Collection* was confirmed in a 28-day clinical study involving adults of all ages. Participants applied *The Rescue Cleanse – Dual Action Recovery* and *The Recovery Cream – Calm and Restore Complex* daily, and results were analysed using standardised clinical assessments.

Redness decreased by **23.5%** after 28 days, with visible improvement within the first week.

Dryness reduced by **30.8%**, while hydration remained consistently higher throughout the study.

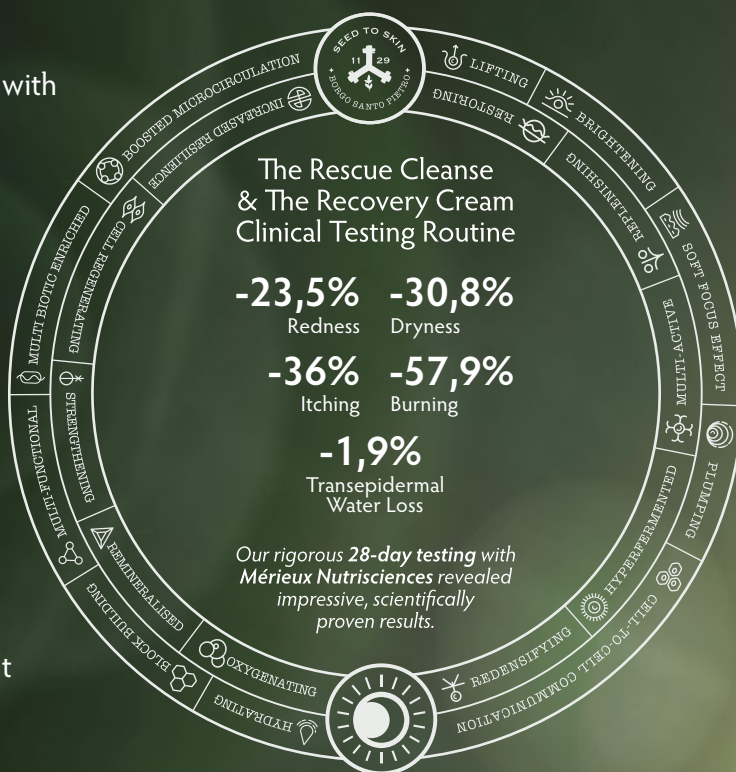

TEWL (Transepidermal Water Loss) decreased by **1.9%**, confirming enhanced barrier repair.

Itchiness reduced by **36%**, confirming a significant improvement in comfort and sensory balance.

Burning sensations decreased by **57.9%**, with participants describing skin that felt calmer, firmer, and visibly healthier.

Participants consistently described their skin as calmer, softer and more resilient, with visible improvements in tone and texture. These results validate the *Restorative Collection* as a curative solution for compromised skin, combining immediate soothing relief with proven long-term repair.

BEYOND COMFORT: A NEW STANDARD FOR SENSITIVE SKIN

The *Restorative Collection* sets a new benchmark in the treatment of reactive skin, offering not just relief but true restoration. Created for those who have long searched for formulations that deliver measurable results, it offers uncompromising efficacy for even the most delicate complexions.

By targeting the biological pathways of inflammation, barrier dysfunction, and oxidative stress, *The Rescue Cleanse* and *The Recovery Cream* achieve visible transformation while remaining 100% biocompatible.

Each product is grounded in science, transparent in formulation, and proven in independent clinical testing, offering those with reactive skin a trusted solution backed by efficacy.

With this launch, Seed to Skin Tuscany redefines what it means to treat sensitivity: a collection that restores not only balance, but confidence, offering skin the freedom to thrive in comfort, health, and equilibrium.

ABOUT SEED TO SKIN TUSCANY

Seed to Skin Tuscany is an award-winning skincare and spa line dedicated to a holistic 360° approach to ethical consciousness. From soil health to formulation, we control every step of the production process with meticulously cultivated ingredients from the certified organic farm at Borgo Santo Pietro and a network of selected partners equally dedicated to sustainability and excellence. Each ingredient is carefully traced and tested in our on-site lab to guarantee purity, efficacy, and safety. Our formulations blend supercharged wild-harvested ingredients with natural extracts, harnessing Green Molecular Science to unlock nature's healing potency at unprecedented levels. This enables us to provide skincare solutions that harmonise with the skin's innate regenerative mechanisms and deliver effective and clinically proven results.
